

# Caregiver Stress Test

Caregivers are usually so involved in caring for the needs of their loved ones that they can easily lose sight of their own needs. To get a better idea of the level of stress you are dealing with as a primary caregiver, please answer the following questions as honestly as possible. Taking this test periodically as you are caring for your loved one will also help you to recognize changing stress levels which can be addressed before feeling too overwhelmed.

**Insert the point value corresponding to your answer: 0=Never, 1=Rarely, 2=Sometimes, 3=Frequently**

## SCORING

### 0 - 15 = Minimal Stress

Stress levels are easily managed. Keep evaluating your stress level periodically to see if your stress level increases.

### 16 - 30 = Mild Stress

Your stress level is tolerable, but you should also consider asking for some help or taking more time for yourself. Set some time aside for yourself each week or join a caregiver support group to help reduce your stress level.

### 31 - 45 = Moderate Stress

Taking some time off should be considered to help reduce stress. A good option could be to ask family members for support or look into respite care or adult day care. Contact our senior resource center at [www.AskAgape.com](http://www.AskAgape.com) or call 1-800-411-AGAPE (2427) for resources, information, and options. Our Senior Solutions Advisors can assist you with care giving services in your area.

### 45 - 60 = Severe Stress

You should seriously consider working with one of our Senior Solutions Advisors about options available right now for either in-home care or services available at any of our residential care communities.
